NEW DEVICE HELPS FIRST RESPONDERS SAVE LIVES

Cleveland, Ohio, December 15, 2000—Compliant Corporation today announced its latest version of the CPR Prompt® Rescue and Practice Aid. The improved audio prompting device meets or exceeds the American Heart Association International Guidelines 2000 for CPR and Emergency Cardiovascular Care. According to the AHA, “Audio prompting devices facilitate consistent repetitive practice, which results in improved initial acquisition and retention skills.”¹

Compliant’s CPR Prompt® Rescue & Practice Aid acts as a coach during real cardiac emergencies and provides a fast, easy way to refresh CPR skills and knowledge. Using patented advanced microchip technology, the voice prompt calmly talks trained users through every step of adult, baby and child CPR.

Features of the CPR Prompt® Rescue & Practice Aid include:

- *Meets all New AHA guidelines for CPR*
- Easy to use
- Economical
- Increases skills retention
- Runs on two 9V batteries
- FDA Class I Medical Device

Includes: Rescue and Practice Aid (uses two 9V batteries, not included), Use and Care book and wall mount.

The new CPR Prompt replaces the CPR1, CPR100 and CPR200, which revolutionized the audio prompting market. According to Compliant's Vice President of Engineering, John Pastrick "The new device, incorporates scripting from the latest AHA CPR Guidelines and has improved electronics that permit more voice data to be stored."

The New CPR Prompt® Rescue & Practice Aid will be available from distributors beginning April 1, 2001. For more information and a distributor list, call Compliant at (800) 667-3541.

Headquartered in Cleveland, Ohio, Compliant delivers business-to-business, Internet-based solutions that revolutionize the way organizations define, distribute, administer and measure their compliance with mandated regulatory, organizational and industry standards. These new economy solutions leverage world-class subject matter expertise, an Internet software application that incorporates a unique integrated learning system and a nationwide staff of educators that annually train over 240,000 in 100+ compliance topics. For more information about the company or its status as a national training center for the American Heart Association and the National Safety Council, visit it's the Compliant web site at www.compliant.com.
